EDUCATION

Rutgers University

- M.S. in Computer Science
- B.S. in Computer Science, Data Science

New Brunswick, NJ

Sep. 2025 – May 2027

Sep. 2022 – May 2025

EXPERIENCE

Gogentic AI

Full-Stack Developer Intern

Houston, TX

Jul. 2025 – Aug. 2025

- Developed NeuroVault, an AI memory system that turns audio and thoughts into structured intelligence, building the frontend with React, TypeScript, and Tailwind CSS. Optimized performance with Vite, reducing load times by 30% while increasing user engagement
- Engineered the backend with FastAPI and Python, designing RESTful endpoints for audio/PDF processing and integrating SQLite/Neo4j for local-first storage, significantly reducing cloud costs while achieving sub-200ms latency
- Implemented RAG pipelines using ChromaDB, OpenAI embeddings, and LangChain, enabling semantic search across 10K+ documents and boosting query accuracy by 25%
- Streamlined deployment with Docker (40% faster) and collaborated in Agile sprints to ensure timely feature rollouts

Aroopa, Inc

Software Developer Intern

Monroe Township, NJ

Jun. 2025 – Aug. 2025

- Built a production-ready MERN stack (React + Node.js/Express) that scaled to support 8K+ monthly users
- Created and implemented responsive UI components using HTML, Tailwind CSS, and React, boosting user engagement by 15% and improving overall user experience
- Architected MongoDB schemas and REST APIs using Postman, achieving higher reliability, and 40% faster data retrieval through query optimization
- Conducted unit and integration testing, resolving 10+ functional issues ensuring a scalable application

Memorial Sloan Kettering Cancer Center

Software Engineering Intern

New York, NY

Jun. 2024 – Aug. 2024

- Engineered a Conditional GAN model that generates synthetic clinical data for testing, reducing manual data creation by 30% while maintaining data privacy and high fidelity to real patient data
- Optimized machine learning pipelines using TensorFlow, Keras, and Scikit-learn, improving computational efficiency by 25% by integrating OneHotEncoder for complex datasets and ensuring machine-readable formats
- Automated data preprocessing workflows with Pandas and Scikit-learn, significantly reducing ETL process runtime and enhancing data transformation accuracy
- Containerized the development environment using Docker and integrated it into a CI/CD pipeline, ensuring faster deployments, reproducibility, and reduced configuration discrepancies

PROJECTS

Online Auction System | JavaScript, Java, MySQL, JSP, JDBC, HTML/CSS, AWS (EC2, RDS), Apache Tomcat

- Designed a secure web-based, full-stack auction platform using Eclipse, featuring user authentication, real-time bidding, and automated alert notifications, deployed on AWS cloud infrastructure (EC2 + MySQL RDS database), reducing latency by 40%
- Developed advanced search and filtering functionalities, along with administrative tools to generate detailed sales reports, enhancing user experience by 25% and system management

Cafe Bliss App | Java, JavaFX, Android Studio

- Built an Android application following the MVC design pattern to enable seamless menu browsing and order management, featuring dynamic cart updates, custom quantities, and multi-screen navigation
- Leveraged modern UI components such as RecyclerView and Singleton Pattern for efficient data handling and interactive user experience, ensuring scalability and maintainability

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, SQL, C/C++, C#, R, HTML/CSS

Frameworks: React, Node.js, Express.js, Next.js, FastAPI, Spring Boot, Django, Flask, .NET, JUnit, JQuery

AI/ML: TensorFlow, PyTorch, Keras, Scikit-Learn, LangChain, Hugging Face, OpenAI Whisper

Cloud & DevOps: AWS, GCP, Azure, Docker/Kubernetes, GitHub Actions

Databases: MongoDB, PostgreSQL, MySQL, SQL Server, Neo4j, SQLite, ChromaDB

Tools: Git, Postman, REST APIs, Tableau, Power BI, VS Code, IntelliJ IDEA, Android Studio, MATLAB, RStudio

Libraries: Redux, Three.js, NumPy, Pandas, matplotlib, spaCy, Tesseract.js
